

Silvano Dio

Electronic music made to feel, remember and move to.

Turning emotions, places and memories into electronic music.

Artist bio

Silvano Dio is a Belgian DJ and electronic music producer whose work blends the energy of house music with melody, emotion and storytelling. Rather than being confined to a single electronic genre, his productions move naturally between House, Afro House, Melodic House, Melodic Techno and other club-oriented influences. His music is often inspired by real moments: a journey, a place, a relationship, a memory or simply a feeling worth preserving. These experiences become warm melodies, hypnotic rhythms and atmospheric electronic productions designed to connect emotionally while still belonging on the dancefloor. At the heart of the Silvano Dio project is a simple idea: electronic music can make people dance, but it can also tell a story.
